Edge Plus Table Edging

Edge Plus injection moulded edging gives you so much more than traditional table tops in terms of shape, versatility and freedom of design. It provides ultimate durability as the edging system is bonded directly to substrate.

Edge Plus allows for clean and seamless edges, is virtually indestructible and it offers high impact strength. The colour is full depth and will not fade or scratch.

Edge Plus offers ergonomic designs, shapes and profiles. Designed to suit banqueting, conference and hospitality tables.

Edge Plus uses leading German technology to bring affordable, versatile solutions that look good, last longer and offer a virtually endless stream of design possibilities.

Edge Plus allows endless design possibilities. The polyurethane edging is chemical, heat and moisture resistant making it hygienic and serviceable.
